EXPERIENCE

Software Engineer

Wedevs Ltd · Dec 2021 - Present

Currently working on a SAAS based multi vendor ecommerce platform which is based on a micro service architecture.

Highlights:

- Designed & developed some REST APIs services, admin dashboard, vendor panel, and the website.
- Worked on microservice architecture design, cluster configuration & configuring the local development environment with Docker, Kubernetes, etc.

Fullstack Developer

Glo.Bu.S Srl · May 2020 - Nov 2021

Responsible for the developing new features of their existing application and solving high priority issues on production environment.

Highlights:

- Fixed critical bugs in their existing system.
- Developed some important features like shipping management, travel management, schedule booking, container & cargo management, warehouse management, billing etc of their logistic system

Web Administrator

Easy Fashion Ltd · Feb 2018 - Sep 2019

Responsible for maintaining their e-commerce platform and developing software solutions for their internal uses.

Highlights:

- Developed a Garments & Inventory Management System.
- Integrated payment gateway & stock management with their ecommerce.
